REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

The prior arts of record teach an invention that contemplates a partial CRC calculation to generate an n bit CRC which requires much less storage than the brute force approach. He also teaches to determine the CRC for a particular header the CID bits for that particular header is used as an address to access the first table. The predefined CRC stored at the accessed location is concatenated to bits of the LI and UUI fields to form an address to access the second table. Allen, JR. et al., U.S. Patent Application No. 2004/0100966 is one such example of prior art. The prior arts of record, however, fails to teach, singly or in combination, a reinsertion circuit coupled to a scaling circuit that is configured to determine a modified signal by combining the at least one bit selected from a CRC index with the signal. The subject matter sought to be patented as recited in the claims in this application has practical applications in the field of managing network traffic.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
